PROFESSIONAL SUMMARY

Passionate Java Developer with proven experience in building scalable and high-performance applications using Core Java, Java 11/17, Spring Boot, Microservices, JPA/Hibernate, and Design Patterns. Strong expertise in REST APIs, API Gateway, Discovery Server, Spring Security, JWT, Keycloak, and event-driven architecture with Apache Kafka. Hands-on experience with MySQL, Oracle, JDBC, Redis Cache, and Apache Solr for optimized data management and search capabilities. Proficient in distributed systems, Docker-based containerization, and monitoring/logging tools including Splunk, Checkmarx One, Seeker, and Metrics. Experienced in Agile environments using Jira and Bitbucket, with solid knowledge of BPM and secure coding practices. Dedicated to solving complex backend challenges and immediately available to contribute effectively within dynamic, growth-oriented teams.

SKILLS

- Languages: Core Java, Java 11/17/21, J2EE, Collections, JDBC
- Frameworks: Spring Boot, Spring Data JPA, Hibernate, Microservices, Apache Kafka, BPM, API Gateway, Eureka
- Security: Spring Security, JWT, Keycloak, OAuth 2.0, LDAP, Checkmarx One, Seeker, SCA, SAST
- Databases: MySQL 8, Oracle 11, PostgreSQL, MSSQL, Redis Cache, Apache Solr
- DevOps & Cloud: Docker, Kubernetes, GCP, Git, Bitbucket, Azure DevOps, Maven, CI/CD, Github actions
- Tools: IntelliJ IDEA, Eclipse, STS4, Postman, Swagger, Splunk, Jira, Putty, WinSCP
- Frontend (Basic): HTML, CSS, Bootstrap, Thymeleaf, JavaScript

Mumbai

WORK HISTORY

Ajex Logistics - **Sr. Java Microservices Developer**
Saudi Arabia • 01/2025 - Current

- **Project:** Enterprise Warehouse Management System (WMS)
- Serving as the **Technical Lead** for the design, development, deployment, and production support of a scalable, microservices-based **Warehouse Management System (WMS)** handling inbound, outbound, inventory, picking, packing, shipment, and billing operations with real-time inventory visibility.
- Architected and developed core modules including **Inbound** (ASN, SKU validation, barcode scanning), **Inventory Management** (bin allocation, stock transfers, cycle counting, inventory adjustments), **Outbound** (order allocation, picking, packing, dispatch), **Shipment Management**, **Billing**, and **SKU & Barcode Services**.
- Integrated the WMS with **Oracle Fusion ERP** through secure REST APIs to automate **billing, financial transactions, and enterprise data synchronization**, ensuring seamless communication between warehouse operations and ERP.
- Designed and implemented an **event-driven architecture** using **Apache Kafka** for asynchronous communication, enabling high throughput, scalability, and fault-tolerant processing across distributed microservices.
- Developed secure, production-grade **Spring Boot REST APIs** with **JWT authentication**, role-based authorization, centralized exception handling, validation, and API documentation.
- Optimized database performance through **query tuning, indexing, stored procedures, and transaction optimization**, significantly improving response time for high-volume warehouse operations.
- Containerized microservices using **Docker** and contributed to deployment, release management, monitoring, and production issue resolution.

CERTIFICATIONS

- Oracle Java Foundation
- Apache Kafka Using Java Spring Boot
- Microservices with Spring Boot, Docker, Kubernetes
- Learning AI (Spring Boot with LangChain4J)

LANGUAGES

English, Hindi, Urdu:

AWARDS

Promising Newcomer Award, Team Award

- Led technical design discussions, code reviews, requirement analysis, task estimation, and collaborated closely with QA, UI, DevOps, and business teams to deliver enterprise-grade solutions.
- Provided **end-to-end ownership**, including architecture, coding, debugging, production support, root cause analysis (RCA), performance tuning, bug fixes, and mentoring developers to ensure high system reliability and on-time delivery.
- Tech: Java 17, Spring Boot, JPA/Hibernate, MySQL, Oracle, Apache Kafka, Docker, JWT, Keycloak, GCP, K8s,

Saksoft Limited | TransUnion CIBIL - **Sr. Developer**
Mumbai • 09/2023 - 12/2024

- Project: TUDF (TransUnion Data Format)
- Developed application for banks to transform raw credit data into readable format with EMI, credit card, and account ownership insights.
- Integrated Apache Solr for single/bulk search, Excel-based bulk processing, and LDAP SSO authentication.
- Built modules: Login (CIBIL SSO), TUDF Viewer, Action Log, Manual & Bulk Indexing.
- Tech: Java 11, Spring Boot, JPA, PostgreSQL, Apache Solr, Thymeleaf, LDAP.

Saksoft Limited | TransUnion CIBIL - **Sr. Developer**
Mumbai • 09/2023 - 12/2024

- Project: Dispute Resolution System (DRS)
- Built dispute system for individuals and bank members to raise credit-related disputes via Consumer Connect portal.
- Managed enquiry processing with ECN-based credit reports stored as TUEF strings from consumer bureau.
- Tech: Java 11, Spring Boot, JPA, MSSQL.

Saksoft Limited | TransUnion CIBIL - **Sr. Developer**
Mumbai • 09/2023 - 12/2024

- Project: Self-Service Portal
- Built portal for ECN-based inquiry retrieval with date filters, Google CAPTCHA security, and Netcore mobile notifications.

MindCraft Software Pvt. Ltd. | Kotak Life Insurance - **Developer**
Mumbai • 02/2022 - 09/2023

- Project: EPIC – Policy Scrutiny System
- Developed insurance scrutiny modules automating policy lifecycle from purchase to issuance using microservices and rule engines.
- Implemented data flow through EPIC portal with risk analysis and bucket-based policy routing (Branch, NB-CPC, Life Asia, Underwriter).
- Used BPM for process automation and Apache Kafka for inter-service communication.
- Tech: Java 1.8, Spring Boot, JPA, Apache Kafka, BPM, Oracle, Microservices.

Taxtron Technologies Pvt. Ltd. | Maharashtra Pollution Control Board - **Java Developer**
Lucknow • 07/2019 - 02/2022

- Project: IDSS – Intelligent Decision Support System
- Built pollution compliance reporting system for MPCB covering Air (CAAQMS), Water, and Solid pollution modules.
- Developed data analytics and prediction features for ambient pollution data across Maharashtra industries.
- Tech: Java 1.8, Spring Boot, Angular, Git, Maven, MySQL.
